A. Eligibility Determinations of Individuals Who Are Age 65 or Older or Who Have Blindness or a Disability

Eligibility determinations of individuals who are age 65 or older or who have blindness or a disability are based on one of the following:

1. SSA Eligibility Determination State (1634 State)

The state has an agreement under section 1634 of the Social Security Act for the Social Security Administration to determine Medicaid eligibility of SSI beneficiaries. For all other individuals who seek Medicaid eligibility on the basis of being age 65 or older or having blindness or a disability, the state requires a separate Medicaid application and determines financial eligibility based on SSI income and resource methodologies.

2. State Eligibility Determination (SSI Criteria State)

The state requires all individuals who seek Medicaid eligibility on the basis of being age 65 or older or having blindness or a disability, including SSI beneficiaries, to file a separate Medicaid application, and determines financial eligibility based on SSI income and resource methodologies.

3. State Eligibility Determination (209(b) State)

The state requires all individuals who seek Medicaid eligibility on the basis of being age 65 or older or having blindness or a disability, including SSI beneficiaries, to file a separate Medicaid application, and determines financial eligibility using income and resource methodologies more restrictive than SSI.

B. Additional information (optional)
