CollabT – An ICD-10 Coding Practice Opportunity

□ What is CollabT?

- CollabT = Collaborative Testing
- CMS's contractor, Noblis, subcontracted with Edifecs to develop a testing tool for State Medicaid Agencies and their providers
- In Ohio, the web-based tool provides an opportunity for providers to **practice ICD-10 coding** with real medical records
- The tool provides instantaneous feedback so coders can learn from their mistakes
- There is no cost for providers to practice ICD-10 coding using the CollabT tool
- For more information and to enroll, please see:
