# Introduction

The Ohio Department of Medicaid (ODM), Office of Managed Care, releases a quarterly consumer dashboard summarizing managed care plans' performance in key operational areas<sup>1</sup>. The purpose of this quarterly consumer dashboard is to visually depict plan performance across all the plans and at an individual plan level. The key areas displayed on the dashboard represent areas for which a compliance standard exists, which allows ODM to identify trends and systemic challenges that may need to be addressed. An explanation of each of the consumer dashboard element is listed below.

## Dashboard Elements

**Member Complaints:** Members may choose to contact the Ohio Medicaid Hotline and submit a complaint about a managed care plan (MCP). Member complaints are tracked using the Healthtrack database developed by the Hotline vendor. Healthtrack does not include complaints submitted directly to an MCP by members.

**Appeals:** If a member's request for a service results in a denial, reduction, suspension or limited authorization, they may request that the MCP review the adverse benefit determination. This is known as an appeal. MCPs must resolve a standard appeal within fifteen calendar days<sup>2</sup> (see OAC 5160-26-08.4 and 5160-58-08.4). All appeals are resolved by the managed care plans and reported to ODM monthly. If an appeal to the MCP results in an unfavorable decision to the member, they have the right to request a state hearing.

**State Hearings:** A member may request a state hearing once they have exhausted the plan's appeals process (see 5160-26-08.4 and 5160-58-08.4). The Office of Managed Care reviews all state hearing requests to monitor, track, and trend all decision outcomes.

## Conclusion

As stated above, the quarterly consumer dashboard does not represent the entire scope of monitoring and oversight activities conducted by ODM. Please see the Managed Care Plan Provider Agreement for specific contract requirements and associated compliance actions.

<sup>1</sup> The quarterly dashboard contains information from the previous quarter due to the timing of available data elements.

<sup>3</sup> A member can ask for a quicker decision if their health condition requires it.
