SUBJECT: CMMI Notice of Funding Opportunity for the Maternal Opioid Misuse (MOM) model

Many of ODM's contracted Medicaid Managed Care plans have expressed interest in the recent Centers for Medicare and Medicaid Innovation (CMMI) Notice of Funding Opportunity for the Maternal Opioid Misuse (MOM) model. This opportunity, for selected Medicaid states, seeks to test alternative payments to support a coordinated care delivery model for pregnant women with opioid use disorder (OUD) and their infants, addressing quality of care and cost challenges.

At this time, given the enormity of change within the behavioral health system and the recent submission of the Substance Use Disorder (SUD) waiver that incorporates many of the desired care delivery components, the Ohio Department of Medicaid is not pursuing this CMMI grant. However, in conjunction with the Ohio Perinatal Quality Collaborative, we have identified sites in a "hub and spoke" arrangement to coordinate and integrate obstetrical and infant care for women with OUD. These sites are listed below:

- Adena Regional OB (Ross)
- Akron General AccessPoint (Summit)
- Atrium Medical Center (Warren)
- Bethesda North (Hamilton)
- Blanchard Valley Health System (Hocking)
- Fairview Hospital – CCF (Cuyahoga)
- Genesis Healthcare (Muskingum)
- Good Samaritan Hospital – HOPE Site (Hamilton)
- Hillcrest Hospital – CCF (Cuyahoga)
- Lower Lights FQHC (Franklin)
- Mercy St. Vincent Medical Center (Lucas)
- MetroHealth Medical Center (Cuyahoga)
- Miami Valley Hospital – Promise to Hope (Montgomery)
- OhioHealth Grant (Franklin)
- OhioHealth O'Bleness Physician Group (Athens)
- OhioHealth Riverside Methodist (Franklin)
- Promedica Toldeo Hospital (Lucas)
- Southern Ohio Medical Center (Scioto)
- Southview Medical Center (Montgomery)
- Springfield Regional Hospital (Clark)
- St. Elizabeth Boardman (Mahoning)
- St. Joseph Warren (Trumbull)
- St. Rita's Medical Center (Allen)
- Summa Health (Summit)
- The Christ Hospital (Hamilton)
- UC Medical Center (Hamilton)
- University Hospitals – Rainbow Center (Cuyahoga)

We do have plans to re-energize our prior Maternal Opiate Medical Support efforts, but until such time, please contact the clinical partners identified to facilitate access to appropriate levels of care, offering assistance with appointments, transportation and better connectivity with your behavioral health partners. Again, thank you for your interest.
