

2019 MCP Quality Withhold Measurement Year 2018

Dr. Applegate & Jon Barley
November 21, 2019

Ohio Medicaid's Collaborative Quality Strategy: Driving Better Health Outcomes

How Can Plans *Drive Better Health Outcomes*:

- Be effective at population health management by
 - » Early identification & a focus on highest need (risk tier)
 - » If highest risk in common region/ neighborhood, develop a collaborative strategy to address root causes
 - » Purchase comprehensive care appropriate for members needs (value-based)
 - » Establish a Quality Improvement program based on science that impacts outcomes
- Leverage High Value Programs (Comprehensive Primary Care (CPC) / [Episodes of Care](#))
 - » Partner with practices to improve their patient-centered strategy
 - » Collaborate on interventions to improve outcomes on common clinical quality measures

Quality Withhold

- Quality Withhold (QW) supports ODM's quality strategy
 - » Based on population health framework
 - » Encourages MCPs to purchase comprehensive care
 - » Quality improvement science used to improve outcomes
- Indices of clinical quality measures align with ODM's quality strategy
 - » Behavioral Health Index
 - » Children's Health Index
 - » Cardiovascular Disease Index
 - » Diabetes Index
- Person-centered management of health conditions in partnership with providers will lead to better performance on most clinical quality measures related to the condition

Quality Withhold Basics

Quality Withhold Basics

- 2.0% withhold beginning April 2018
 - » MY (Measurement Year) 2018: \$206 million
 - » MY 2019: ~\$315 million
- Quality indices equally weighted for MY 2018 & 2019:
 - » Behavioral Health= 25%
 - » Healthy Children = 25%
 - » Cardiovascular Disease = 25%
 - » Diabetes = 25%

Quality Withhold Basics

Clinical Quality Measures Included in Each MY 2018 Index

Behavioral Health

- *Initiation* of alcohol and other drug dependence treatment
- Follow-up after hospitalization for mental illness, 7-day visit
- Use of multiple concurrent antipsychotics in children (2018 only)
- Use of first-line psychosocial care for children on antipsychotics (added 2019)

Healthy Children

- Well-child visits 0 - 15 months of life
- Well-child visits 3 – 6 years of life
- Adolescent well-care visits
- Weight assessment and counseling for nutrition and physical activity for children/adolescents: BMI percentile documentation (added 2019)

Cardiovascular Disease

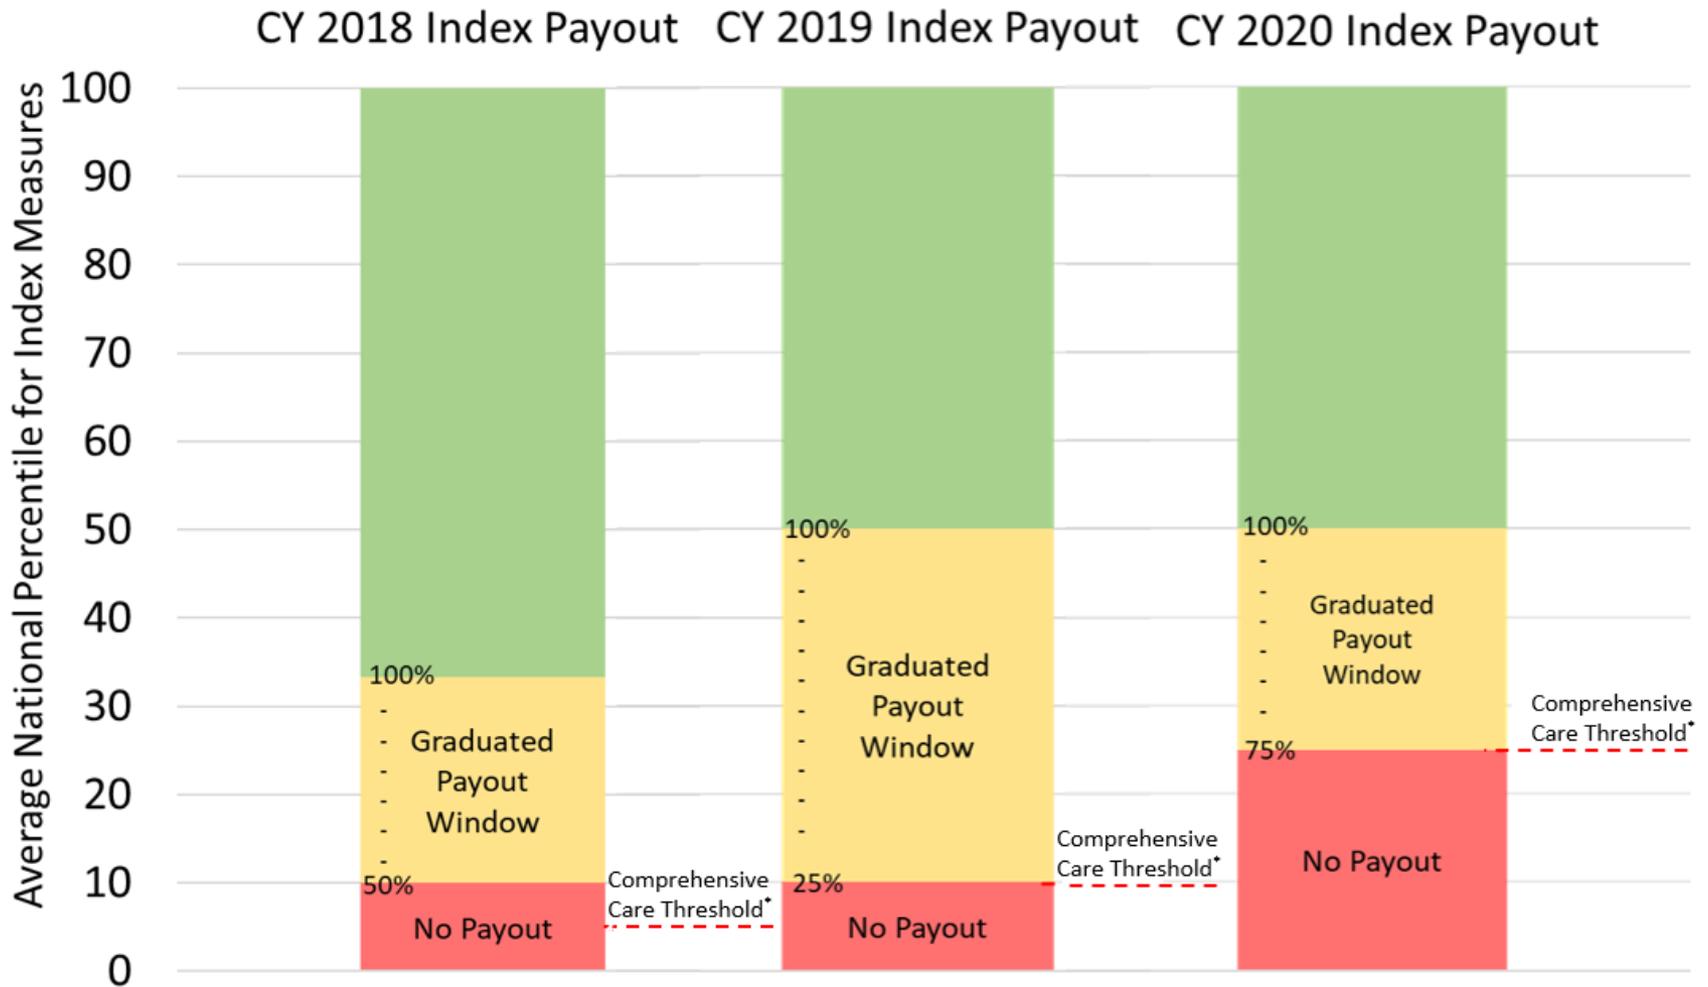

- Hemoglobin A1c (HbA1c) testing
- HbA1c poor control (>9.0%)
- Eye exam (retinal) performed
- BP control (<140/90 mm Hg)

Diabetes

- Controlling high blood pressure
- Statin therapy for patients with cardiovascular disease
- Adult BMI (added 2019)

Quality Withhold Basics

- Two-step process to determine payout
 - » 50% of an index's value is assigned to each step for MY 2018
- Bonus pool for high performing MCPs based on unclaimed withhold money
- Data source: MCP's self-reported, audited HEDIS (Healthcare Effectiveness Data and Information Set) results
- Standards:
 - » Based on national HEDIS percentiles
 - » Reviewed by ODM's actuary

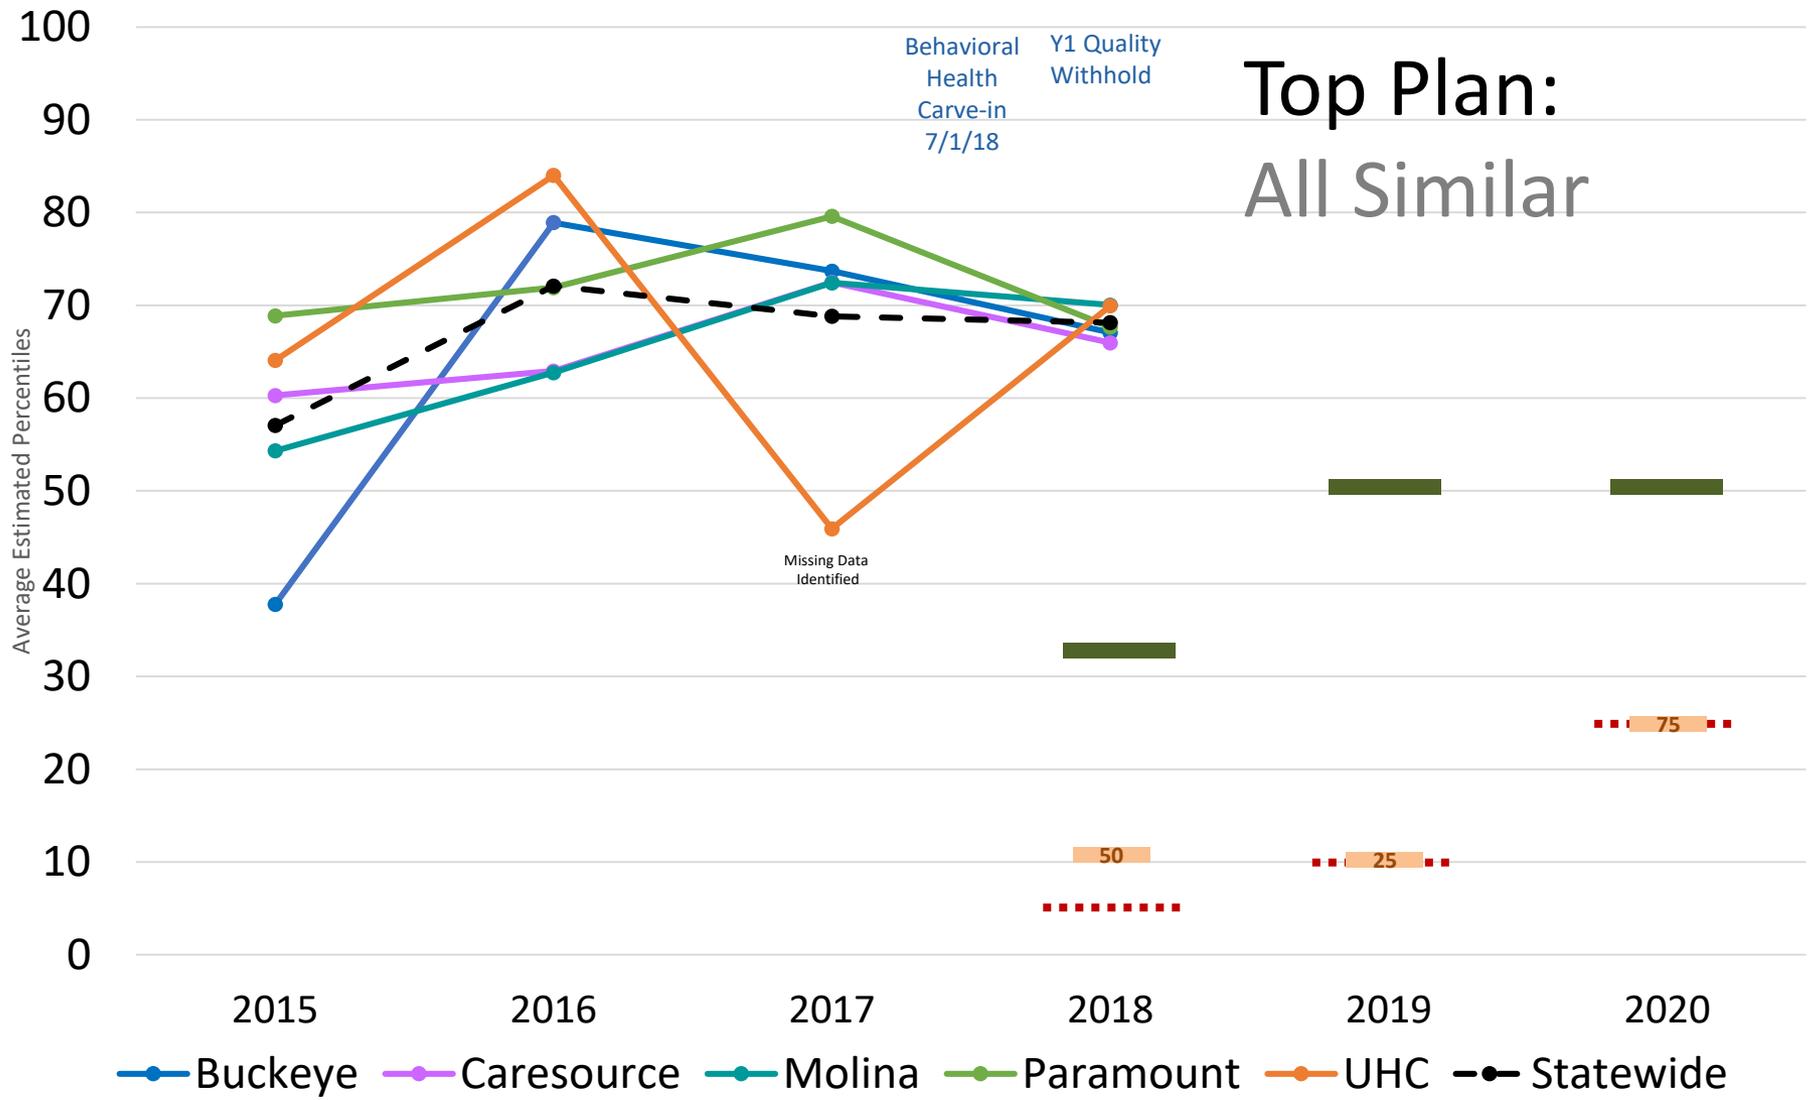

* If all measure results in an Index do not meet or exceed the Comprehensive Care Threshold, the payout = \$0 for the index.

Index scores as detailed in Appendix O of the PA determines QW payouts.

2018 Quality Withhold Results

Behavioral Health Index Average Percentiles¹

¹ Percentiles based on HEDIS benchmarks

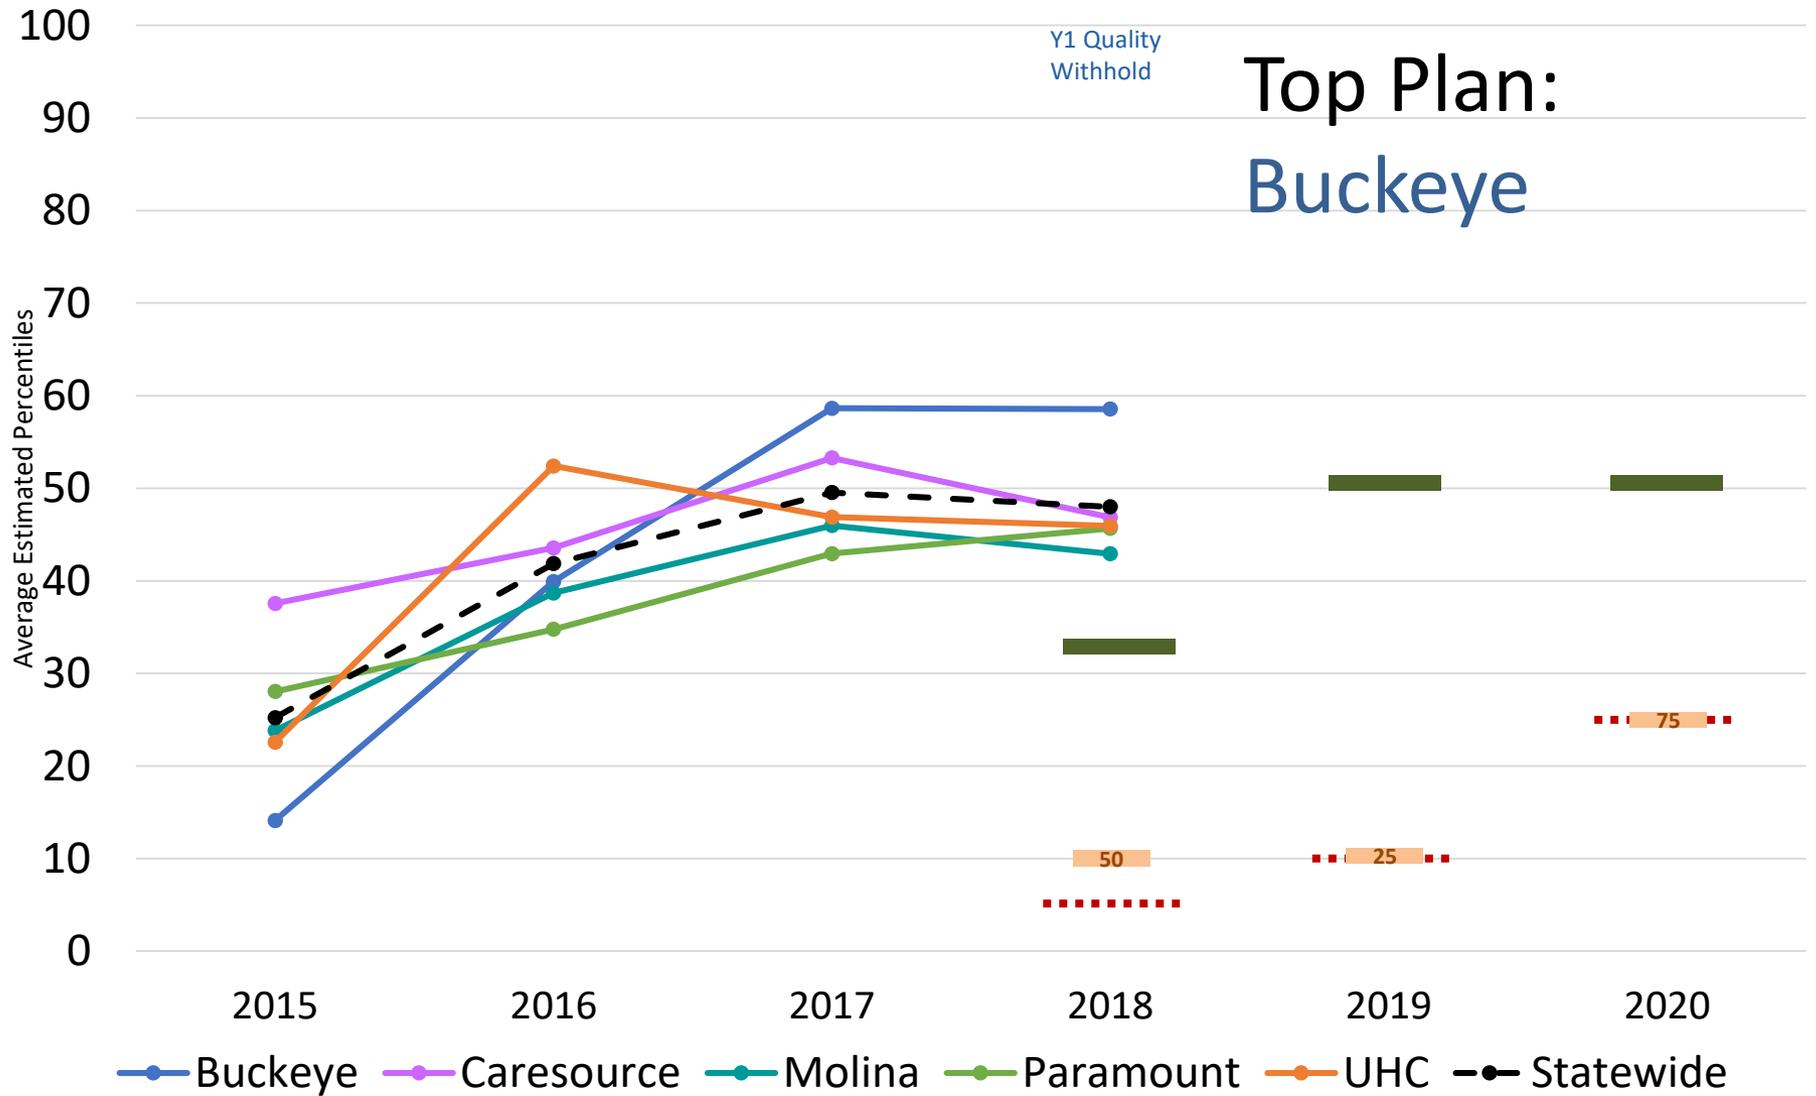

⋯ Comprehensive Care Threshold

Min. score needed for each measure in Index

Index score needed for 100% payout

Index scores as detailed in Appendix O of the PA determines QW payouts.

Children's Health Index Average Percentiles ¹

¹ Percentiles based on HEDIS benchmarks

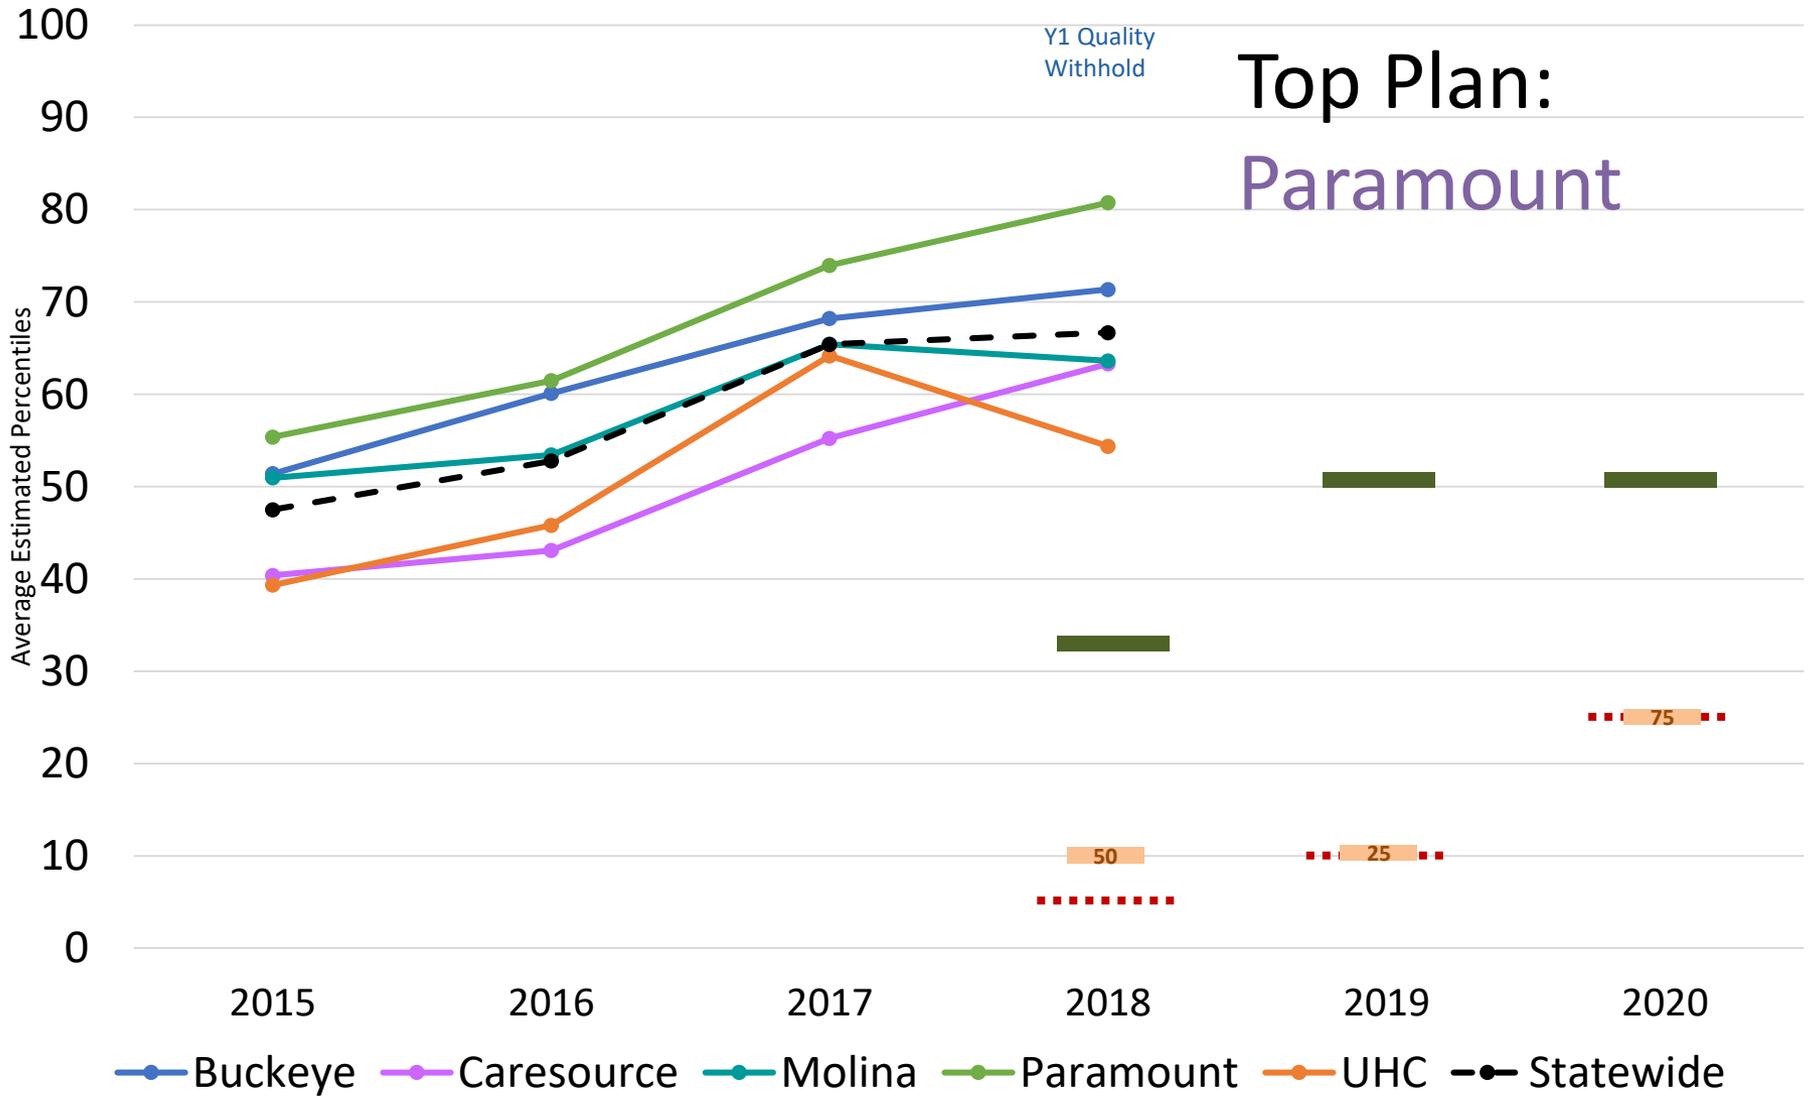

..... Comprehensive Care Threshold

■ 50 Min. score needed for each measure in Index

■ 25 Index score needed for 100% payout

Index scores as detailed in Appendix O of the PA determines QW payouts.

Cardiovascular Disease Index Percentiles ¹

¹ Percentiles based on HEDIS benchmarks

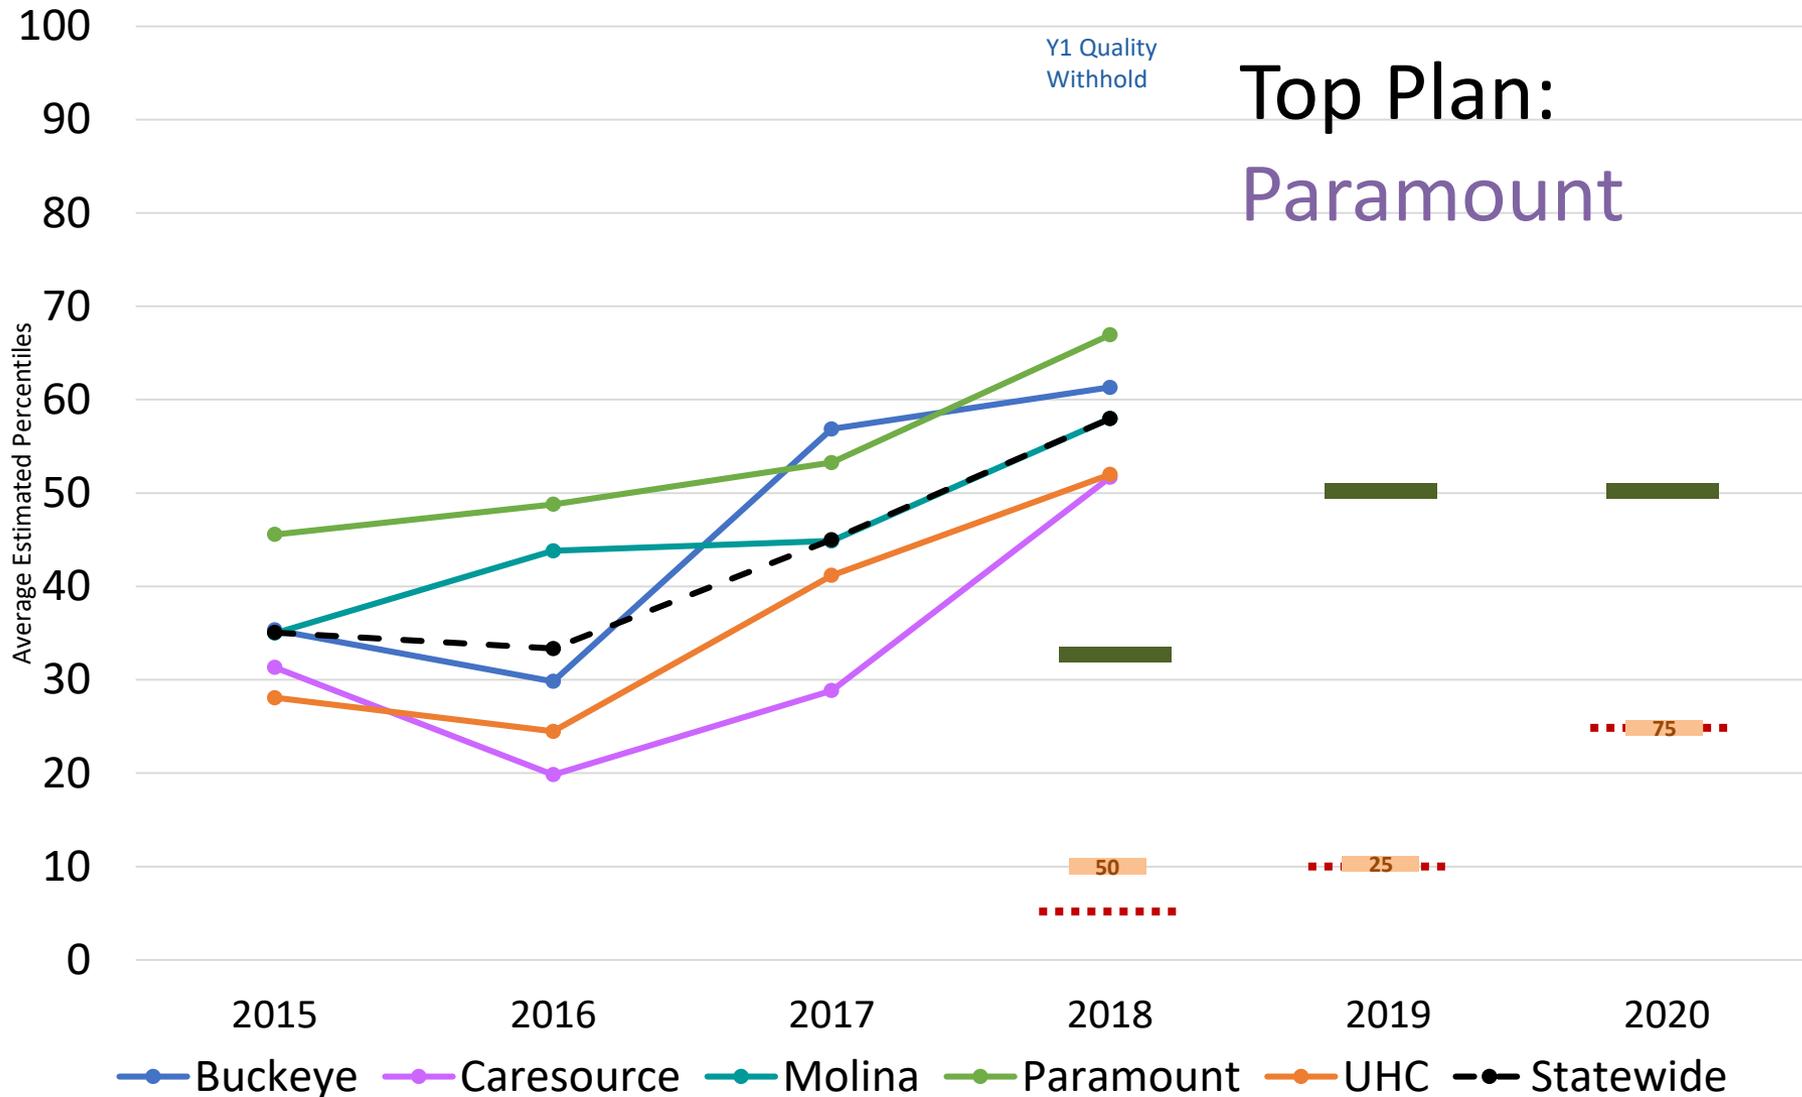

Comprehensive Care Threshold

Min. score needed for each measure in Index

Index score needed for 100% payout

Index scores as detailed in Appendix O of the PA determines QW payouts.

Diabetes Index Average Percentile ¹

¹ Percentiles based on HEDIS benchmarks

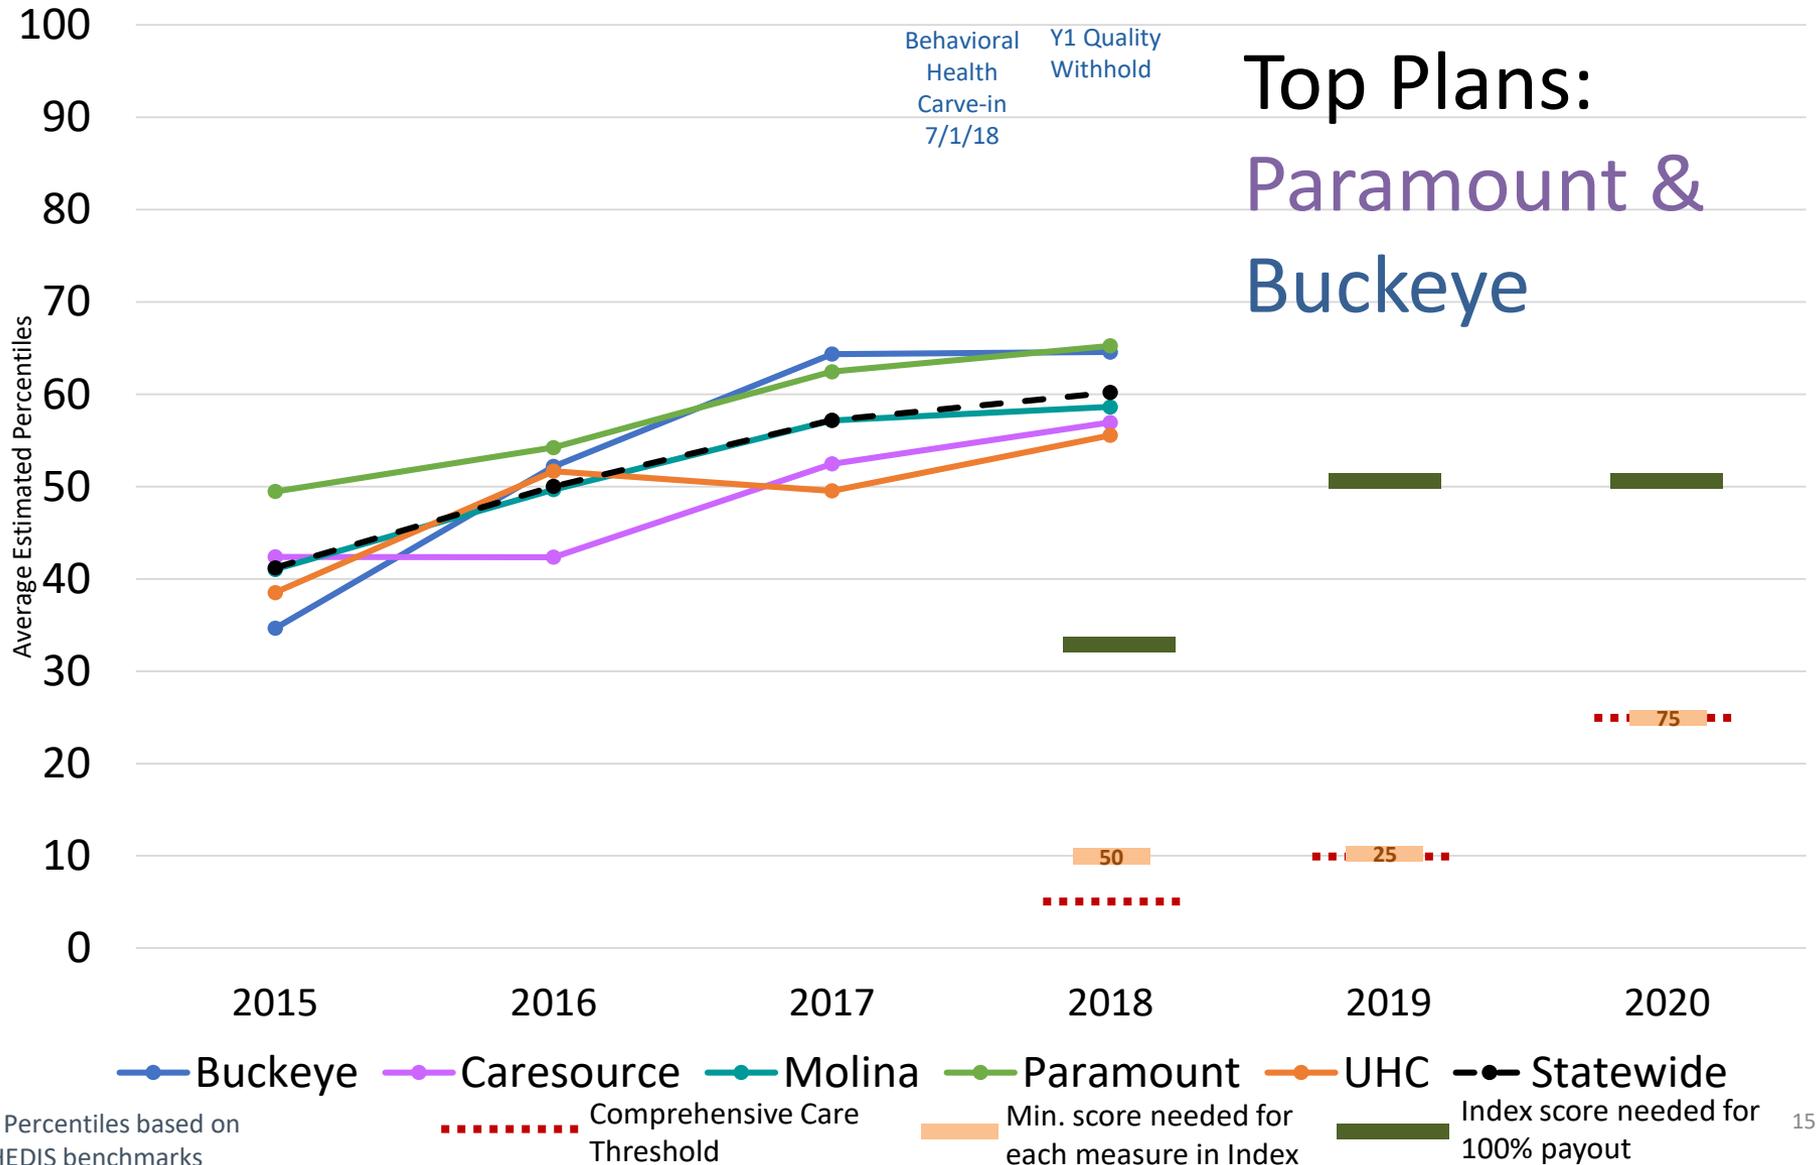

⋯ Comprehensive Care Threshold

Min. score needed for each measure in Index

Index score needed for 100% payout

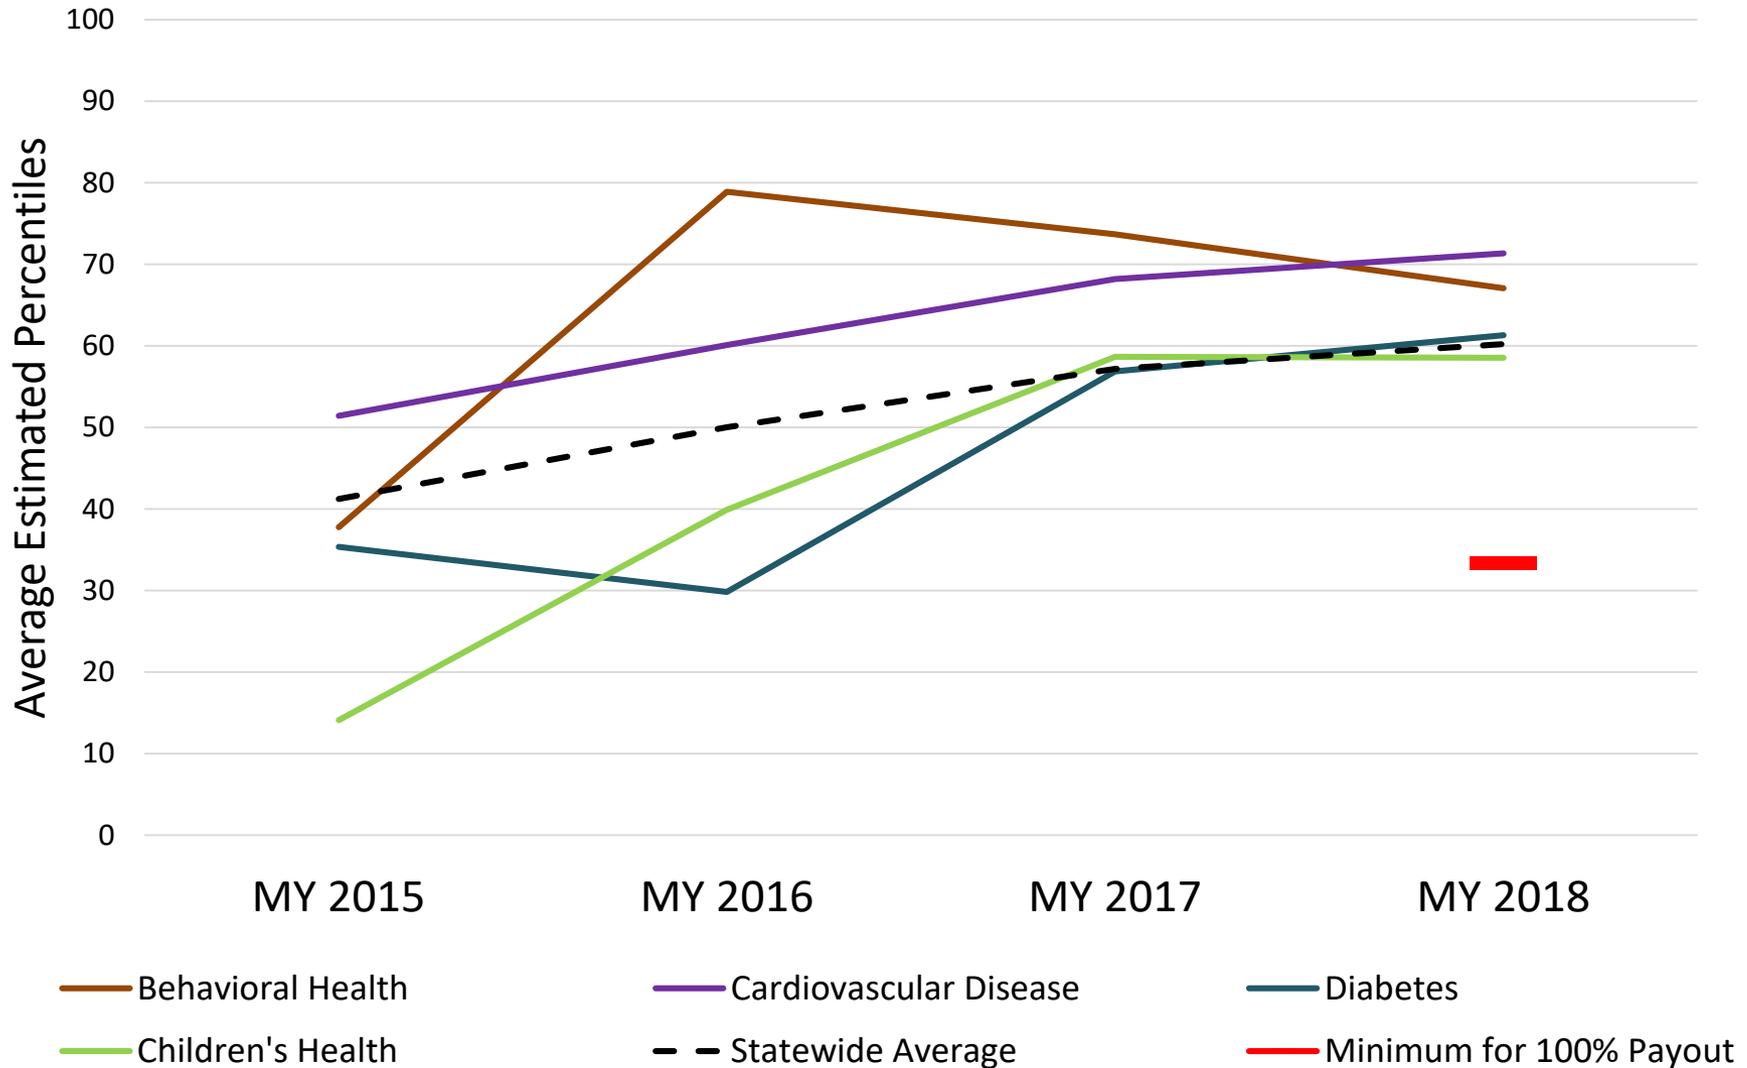

Index scores as detailed in Appendix O of the PA determines QW payouts.

All Indices Average Percentiles ¹

Updates for the MY 2020 Quality Withhold Program

Quality Withhold MY 2020 Updates

- ~~2.0%~~ **3.0%** Withhold, beginning January 2020
 - » 2020: ~\$470 million
 - » 2021: ~\$470 million
- Quality indices weights aligned with priorities:
 - » Behavioral Health = ~~25%~~ **30%**
 - » Healthy Children = ~~25%~~ **30%**
 - » Cardiovascular Disease = ~~25%~~ **20%**
 - » Diabetes = ~~25%~~ **20%**
- Follow-up after BH Hospitalization measure: **breakout for kids/adults**
- Alcohol or other drug (AOD) treatment measure: **include**
Engagement for Youth
- Behavioral Health Index: reweight measures
- **Comprehensive Care Test increase delayed one year**
